Dear Sir D Attenborough,

I have discovered the Patterned eel and will be the most magnificent animal on the Show, ever. The patterned eel is the most intelligent animal because, it can camouflage into anything it wants. It is the fastest animal that has ever lived. With it's patterned skin, it attracts all the animals in the ocean. The patterned eel has the most Poisonous creature in all the world, it squirts out volcano gas out and can kill a fish in one go. I can't think of anything better. Can you?

Yours Sincerely leala xx
