Dear Sir J Attenborough

I have discovered the Magnificent Spiderfish and I think it should be added in the blue planet III because when it is being hunted as quick as a flash it can disappear but ... actually it lays down in a dark shadow and it is not dark enough it turns in visible!!! don't you think it is amazing ??? yes what the amazing Spiderfish has teeth to kill its opponents against it but mostly is prey and it's web can camouflage on anything it has been made on and the Spiderfish can also be the king of all the 7 seas!!!!

Yours Sincerely Willy
